MCP4N8N

Overview

MCP4N8N is a powerful tool designed to streamline the development process by automating key tasks and improving code quality.

Features

- Ease of Use: User-friendly interface that simplifies complex operations.
- Automation: Automate repetitive tasks to save time.
- Integration: Seamlessly integrates with existing tools and workflows.

Installation

To install MCP4N8N, follow these steps:

1. Clone the repository:

```
git clone https://github.com/Joseph19820124/mcp4n8n.git
```

2. Navigate to the project directory:

```
cd mcp4n8n
```

3. Install the necessary dependencies:

```
npm install
```

Usage

To use MCP4N8N, follow the instructions below:

1. Run the application:

```
npm start
```

2. Follow the on-screen prompts to configure the tool for your project.
